

SOFTWARE DEVELOPER

Overview:

Our applications have been in use for over a decade now. Our backend is written in t-SQL running on SQL 2K8 R2 EE. The web applications are written using the ASP.NET MVC3 framework. Our desktop application uses .NET 4.0 WinForms (C#). Our search server uses the C# version of Lucene.

Responsibilities:

- Any host of things – depends on where your skills are the strongest...
- Could be UX for the POS.
- Could be MVC development for the ecommerce platform.
- Could be EDI related coding.
- Could be t-SQL related coding.
- Could be Lucene or search related coding.
- Other responsibilities as assigned.

Suggested Experience and Job Requirements:

- Some mix of the following: MVC3, C#, WinForms, Lucene, t-SQL, jQuery, AJAX, CSS, HTML, Razor script, etc.
- If you love math, that's a plus.
- Experience with touch UI's a plus.
- General UI strength is a plus.

Benefits:

We offer a competitive three tiered compensation package... Base pay, profit sharing, and benefits. We are a relaxed work environment.

About Nanocran:

We have been in business for over a decade. We have rock solid financial strength and fantastic clients. The dynamic nature of our client's businesses let us see our code, service, and analysis put to use quickly - making our jobs even more rewarding.

About You:

We take pride in hiring the person, not the position. If you're not a perfect fit for this specific position, that might be ok. If you have excellent skills, talent, and the right attitude, we'd love to hear from you.

To Apply:

Please send resume and cover letter to jobs@nanocran.com. Please include salary requirements. We look forward to hearing from you!
